

BELGIUM

3 country risk(s) have been identified

- **FAIR BUSINESS PRACTICES (1)**
CORRUPTION (1 RISK)

There is a moderate to high risk of corruption in Belgium's public procurement sector.

- **LABOUR RIGHTS (1)**
DISCRIMINATION & GENDER (1 RISK)

There is a reason to believe that Belgian employers discriminate based on religion. Read more about this in the [Amnesty International](#) report.

- **ENVIRONMENT (1)**
CLIMATE & ENERGY (1 RISK)

The Global Footprint Network calculated that every person on earth can use 1.7 gha (global hectares) to provide for their needs **and** to remain within the carrying capacity of the earth. While some countries remain below this average, this is one of the 10 worst performing countries, with an average consumption of more than 7 gha per capita. The high CO₂ emissions related to the production and consumption in this country are the main reason for this.
