

CSR Risk Check

SAN MARINO

1 country risk(s) have been identified

- ENVIRONMENT (1)

WATER USE & WATER AVAILABILITY (1 RISK)

According to the World Resources Institute, San Marino suffers from a very high water stress. The water stress score is 4.1 on a scale of 0 (low risk) to 5 (extremely high risk). This means that more than 80% of the total renewable water supply is consumed. Both the agricultural (score 4.1) and the industrial (score 4.1) sector are major contributors in this matter.
